

Residency position in Equine Internal Medicine

The clinical department of companion animals and equids, Faculty of Veterinary Medicine, University of Liège, is opening a full-time position to complete a standard residency program approved by the European College of Equine Internal Medicine (ECEIM).

The candidate must be graduated from a veterinary school accredited by the ECEIM. The applicant must have the authorization to practice veterinary medicine in a European Country, and have at least followed a 12 month internship program, or have an equivalent clinical experience (i.e. a minimum of 2 year experience in an equine or mixed clinical practice). He/she must have a good knowledge of French and English. Basic knowledge in Dutch/German and teaching experience will be considered additional advantages.

The candidate will integrate a dynamic clinical team and will be mainly supervised by ECEIM/ACVIM diplomates and secondarily by ECVAA/ECVO/ECVDI Diplomates in order to receive specialist training. He/she will also be required participating in clinical rotations, teaching of master students and interns, and in out-of-hours duty rotations (1 on 4). During the first 4 years, the candidate will also have to fulfil all the requirements of an ECEIM residency, including writing a minimum of 2 first author scientific papers in international peer-reviewed journals, performing training rotations in related disciplines (could be external), participating to ECEIM journal clubs, attending at least 3 congresses or conferences approved by the ECEIM, and giving at least 6 (amongst which 3 external) seminars or professional presentations.

The equine teaching hospital of Liège has a caseload of \pm 1.500 cases/year (among which around 40 % are admitted in out-of-hours emergency), consisting of sports and pleasure horses coming from Belgium, The Netherlands, Germany, Luxembourg and France. The internal medicine case load includes a wide range of medical disorders, including mainly digestive (colic), cardiac, respiratory, sport medicine and neonatology cases. The adult and neonatal intensive care units have a high occupational rate.

Stating date and duration of the position: From 01/10/2017 till 31/09/2021

Applications and further details:

Prof. Hélène Amory

Pôle Equin, Faculté de Médecine vétérinaire,

Avenue de Cureghem 5D

B41 Quartier Vallée 2

4000 Liège 1 (Sart Tilman)

email: helene.amory@ulg.ac.be

Tel: + 32 4 366 4103 or 4144 (secretary) or + 32 4 366 4023 (direct line)

Fax: + 32 4 366 4108

Application files must be sent **before the 06/08/2017**, with a letter of intent, a curriculum vitae, two (2) reference letters (sent directly to the address above) and a copy of grades obtained the last three years of veterinary school. Candidates are highly encouraged to spend a few days in our equine clinic before the application closing date.

Clinician position in Equine Internal Medicine

The clinical department of companion animals and equids, Faculty of Veterinary Medicine, University of Liège, is opening a 2-year full-time position of Equine Internal Medicine clinician starting the 01/10/2017.

The applicant must have the authorization to practice veterinary medicine in a European Country, and have at least followed a 12 month internship program, or have an equivalent clinical experience (i.e. a minimum of 2 year experience in an equine or mixed clinical practice). He/she must have a good knowledge of French and English. Basic knowledge in Dutch/German and teaching experience will be considered additional advantages.

Both junior and senior profiles are welcomed to apply for this position. A junior clinician could have the possibility of extending the contract of employment by applying to an Internal Medicine Residency ECEIM Position that is planned to start at the latest in October 2019. The position might also suit equine practitioners with special interest in internal medicine, senior (ex) residents in progress of obtaining the ECEIM specialty, or ECEIM diplomates.

The candidate will integrate a dynamic team and be in charge of internal medicine consultations and hospitalized patients but will also be required to do some clinical teaching (master students and interns) and participate in out-of-hours duty rotations (1 on 4).

The equine teaching hospital of Liège has a caseload of \pm 1.500 cases/year (among which around 40 % are admitted in out-of-hours emergency), consisting of sports and pleasure horses coming from Belgium, The Netherlands, Germany, Luxembourg and France.
