

A fifteen-vet equine only clinic seeks ECEIM or ACVIM board-certified or board-eligible medicine clinician. The clinic has an established and expanding referral caseload in both medicine and surgery. The medicine caseload is varied, including a significant neonatology component. The role would require an enthusiasm for ambulatory work to support our veterinary team and to further develop the medicine caseload.

Responsibilities to include:

- Working closely with the practice team, including a European Specialist in Equine Surgery, to deliver a comprehensive professional service to our clients and referring veterinary surgeons.
- 1 in 3 out of hours rota to manage emergency admissions to the clinic and ensure care of inpatients, with full support provided by the surgical team, nurses and interns.
- Experience or enthusiasm in emergency abdominal surgery would be an advantage. Appropriate training and CPD would be provided, if interested.
- Management of the established internship programme, including training of the interns through clinical work, journal clubs and imaging rounds.
- Coordination of our laboratory and anaesthesia services.
- Promotion of the clinic and our services, including the provision of CPD to our referring veterinary surgeons.
- There would be the opportunity for peripatetic medicine work to support our referring practices.
- Further involvement in routine stud work could be organised, if desired.

The salary will be commensurate with the candidate's experience and qualifications, and will be discussed further upon application. The package will also include a car, mobile phone and fees for RCVS, ECEIM/ACVIM, BVA and BEVA memberships. The CPD allowance will be consistent with the requirements for maintenance of specialist status.

This is an exciting opportunity to work within a friendly team in a beautiful part of the country and to help shape the development of this forward-thinking practice. We look forward to receiving your application.
