

**Experienced veterinary clinician wanted for immediate start at Troytown Equine Hospital with experience in neonatal foal and internal medicine.**

**The role will primarily involve foal unit case management with our team of vets, nurses and interns with opportunities for involvement in other areas of the hospital and ambulatory practice.**

Based in Co. Kildare Ireland, Troytown GreyAbbey Equine Hospital is a fully dedicated equine service. It provides for all up to date orthopaedic, soft tissue, reproductive and performance investigations and treatments. It has a fully dedicated neonatal intensive care unit.

The hospital provides specialist investigations in bone scanning, magnetic resonance imaging, ultrasonography & radiography; giving ability to treat all cases, whether medical or surgical. Indeed, we are the only practice in the country to offer MRI screening of equine patients and treadmill endoscopy for airway investigations. The hospital has a dedicated isolation unit for treatment and management of infectious diseases. The hospital neonatal intensive care unit is staffed 24 hours a day with dedicated veterinary surgeons, nurses and assistants.

Salary is commensurate with experience and qualifications.
